

Date of AGM and Closing Date for Director Nominations

Melbourne, Australia; 6 October 2020: Cynata Therapeutics Limited (ASX: CYP), a clinical-stage biotechnology company specialising in cell therapeutics, advises, in accordance with ASX Listing Rule 3.13.1, that its Annual General Meeting will be held on Tuesday, 24 November 2020. The Company will follow the measures in place as set by the Australian and Victorian governments for the restriction of gatherings and the implementation of social distancing requirements in response to COVID-19.

An item of business at the AGM will be the re-election and appointment of directors. In accordance with clause 13.3 of the Company's Constitution, the closing date for the receipt of nominations from persons wishing to be considered for election as a director is Tuesday, 13 October 2020.

Any nominations must be received at the Company's registered office no later than 5:00 pm (Melbourne time) on Tuesday, 13 October 2020.

About Cynata Therapeutics (ASX: CYP)

Cynata Therapeutics Limited (ASX: CYP) is an Australian clinical-stage stem cell and regenerative medicine company focused on the development of therapies based on Cymerus, a proprietary therapeutic stem cell platform technology. Cymerus overcomes the challenges of other production methods by using induced pluripotent stem cells (iPSCs) and a precursor cell known as mesenchymoangioblast (MCA) to achieve economic manufacture of cell therapy products, including mesenchymal stem cells (MSCs), at commercial scale without the limitation of multiple donors.

Cynata's lead product candidate CYP-001 met all clinical endpoints and demonstrated positive safety and efficacy data for the treatment of steroid-resistant acute graft-versus-host disease (GvHD) in a Phase 1 trial. Cynata plans to advance its Cymerus MSCs into Phase 2 trials for severe complications arising from COVID-19, acute GvHD and a Phase 3 trial in osteoarthritis. In addition, Cynata has demonstrated utility of its Cymerus MSC technology in preclinical models of asthma, diabetic wounds, heart attack, sepsis, acute respiratory distress syndrome (ARDS) cytokine release syndrome and pulmonary fibrosis.
